■ Introduction

CAN-2017C module follows the CiA DS-301 version 4.02 and DSP-401 version 2.1. You can access the analogue input status and set the configuration by using standard CANopen protocol. CAN-2017C has passed the validation of the CiA CANopen Conformance Test tool. Therefore, you can use it with standard CANopen master easily by applying the EDS file. CAN-2017C has 8 differential analogue input channels. By the CANopen masters of ICP DAS, you can quickly build a CANopen network to approach your requirement.
