

## I-7565-H1

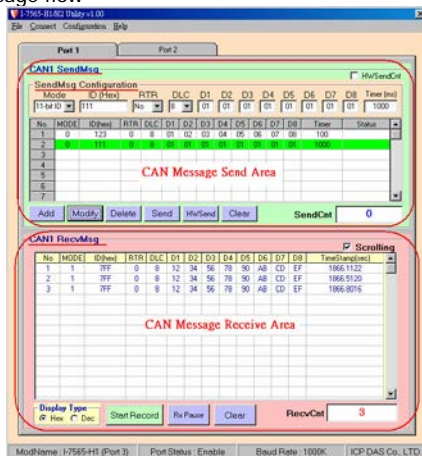

High Performance USB to 1-port CAN bus Converter

### Introduction

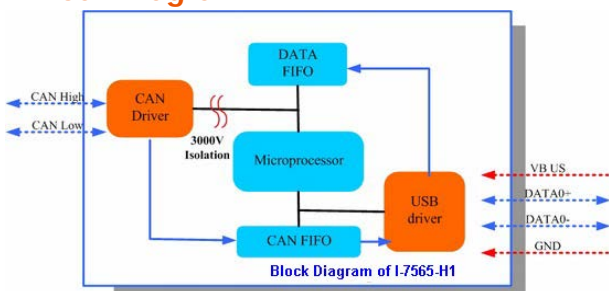

I-7565-H1 is a high performance intelligent USB to CAN converter. It provides faster CAN bus communication performance than I-7565. I-7565-H1 supports CAN2.0A/2.0B protocol and different baud rates from 5 Kbps to 1 Mbps. The important feature of I-7565-H1 is to support the user-defined baud rate function no matter what the baud rate is. When connecting I-7565-H1 to PC, PC will load the relevant device driver automatically (hot plug & play). Therefore, users can make data collection and processing of CAN bus network easier and quicker by applying I-7565-H1.

### Utility Features

- Provide CAN bus user-defined baud rate / acceptance filter configuration
- Easily transmit/ receive CAN messages for testing and display time-stamp of each received CAN message
- Provide saving the CAN message as "TXT" file for data log
- Provide sending CAN message by using the internal timer of module for high precision transmission
- Check / Reset module status remotely and get current CAN bus message flow
