# I-7017RC, M-7017RC Quick Start Guide

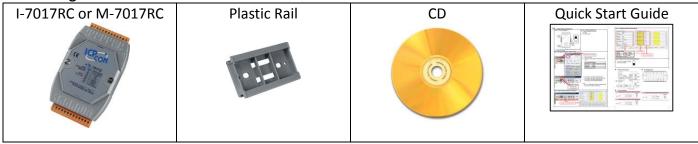

### ■ Warranty

All products manufactured by ICP DAS are under warranty regarding defective materials for a period of one year from the date of delivery to the original purchaser.

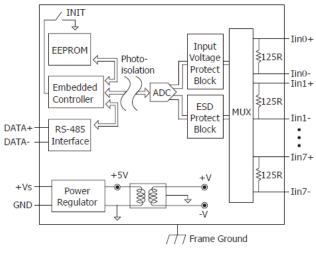

### ■ Warning

ICP DAS assumes no liability for damages resulting from the use of this product. ICP DAS reserves the right to change this manual at any time without notification. The information furnished by ICP DAS is believed to be accurate and reliable. However, no responsibility is assumed by ICP DAS for its use, or for any infringements of patents or other rights of third parties resulting from its use.

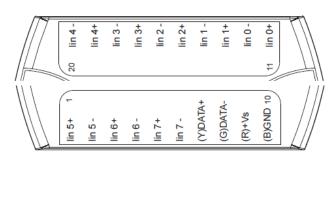

# Packing List

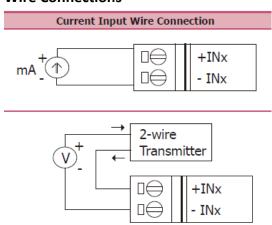

# ■ Internal I/O Structure

### **■** Wire Connections

# ■ Modbus Table (M-7017R only)

- Woodbas Table (W 70171K offiny)					
Address	Description	R/W			
10129 ~	Over/under range status of channel 0	R			
10136	to 7 for 4 ~ 20mA or 0 ~ 20mA ranges				
00129 ~					
00136					
30001 ~	Analog input value of channel 0 to 7	R			
30008					
40001 ~					
40008					
40481	Firmware version (low word)	R			
40482	Firmware version (high word)	R			
40483	Module name (low word)	R			
40484	Module name (high word)	R			
40485	Module address, valid range: 1 ~ 247	R/W			
40486	Bits 5:0	R/W			
	Baud rate, 0x03 ~ 0x0A				
	Code 0x03 0x04 0x05 0x06				
	Baud 1200 2400 4800 9600				
	Code 0x07 0x08 0x09 0x0A				
	Baud 19200 38400 57600 115200				
	Bits 7:6				
	00: no parity, 1 stop bit				
	01: no parity, 2 stop bit				
	10: even parity, 1 stop bit				
	11: odd parity, 1 stop bit				
40487	Type code	R/W			

Address	Description	R/W		
40488	Modbus response delay time in ms, valid range: 0 ~ 30	R/W		
40489	Host watchdog timeout value, 0 ~ R/V 255, in 0.1s			
40490	Channel enable/disable, 00h ~ FFh	R/W		
40492	Host watchdog timeout count, write 0 R, to clear			
00257	Protocol, 0: DCON, 1: Modbus RTU			
00259	Filter setting, 0: 60Hz rejection, 1: 50Hz rejection	R/W		
00261	1: enable, 0: disable host watchdog	R/W		
00269	Modbus data format, 0: hex, 1: engineering	R/W		
00270	Host watch dog timeout status, write 1 to clear host watch dog timeout status			
00271	1: enable, 0: disable fast mode	R/W		
00273	Reset status, 1: first read after powered on, 0: not the first read after powered on	R		

# DCON Protocol

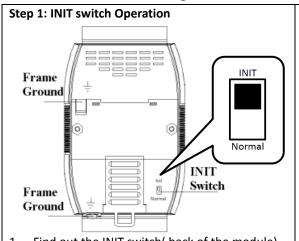

Functions	Command	Response	Notes
Read module name	\$AAM	!AA(Data)	AA: address number
Read module firmware version	\$AAF	!AA(Data)	
Read all analog input data	#aa	>(data)	
Read analog input data of each channel (<=16 channel)	#aai	>(data)	i: channel number (Hex)
Read analog input data of each channel (>16 channel)	#aaii	>(data)	ii: channel number (Hex)

If you want to know the detail DCON protocol, please check it from CD or web

CD path: \\napdos\7000\manual\

Web: ftp://ftp.icpdas.com/pub/cd/8000cd/napdos/7000/manual/

### Module test and configuration

- Find out the INIT switch( back of the module), and turn to INIT.
- 2. Reboot the module

### Step 2: Install & Run DCON Utility

1. Please Install DCON Utility first You can find the software in the CD.

#### CD path:

<Driver>:\napdos\driver\dcon\_utility\

#### Web link:

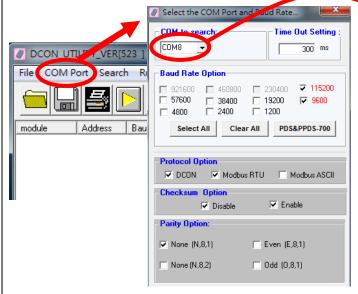

http://ftp.icpdas.com/pub/cd/8000cd/napdos/driver/dcon\_utility/

2. Run DCON utility

DCON\_Utility

### Step 3: Set search configuration & search module

Select COM Port Number

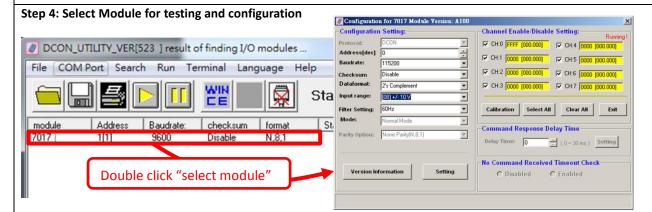

- 1. Click "COM Port"
- 2. Assign the communication information and click "OK"

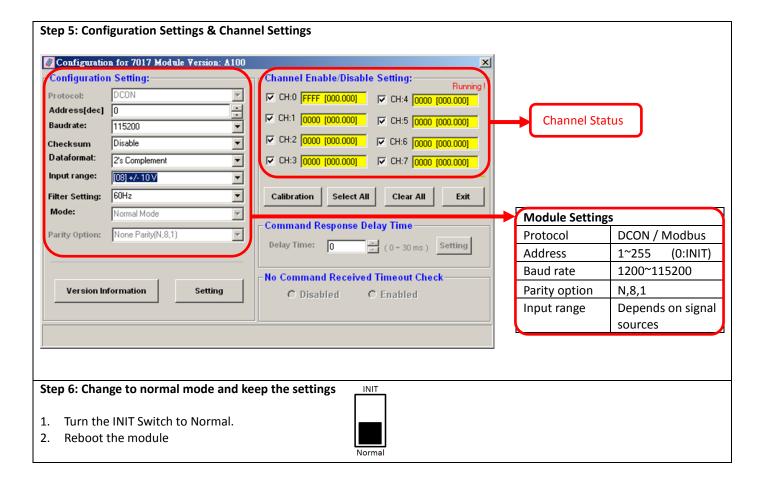

Module Default Setting				
COM Port	Refer converter Port Number			
Baud Rate	9600			
Protocol	DCON for I-7000			
Protocoi	Modbus RTU for M-7000			
Parity Option	N,8,1			

- DCON\_UTILITY\_VER[523] result of finding I/O modules ... File COM Port Search Run Terminal Language Help Start Address module Baudr checksum format Status 7017 1[1] 9600 Disable N,8,1 Run Terminal Start Searching Stop Searching
- 3. Click "Search" and select "Start Searching"
  Software will search the modules from COM Port
- Click "Search" and select "stop searching" Manual stop when the modules searched

#### Note:

When no module can be searched, please check the wire and communication information

### Trouble Shooting

### Q1. How to do when forgot module address or baud rate?

Please turn to INIT mode, and run DCON Utility to search.

The module supports DCON protocol at the INIT mode.

And the address is 0. The communication setting is "9600,N,8,1".

# Q2. How to configure the I-7000 and M-7000 modules?

ICP DAS provide DCON Utility to configure I-7000 and M-7000 modules.

Please download the last version from: http://ftp.icpdas.com/pub/cd/8000cd/napdos/driver/dcon\_utility/

# Q3. I-7017RC & M-7017RC are the current input modules. Do they need external resistors for the measurement?

No, please refer internal I/O structure.

There is a  $125\Omega$  resistor inside for each channel.

## Q4. How to calibrate the analog input module?

Usually it is not necessary to calibrate the analog input module.

However, in case you need to perform this operation, we provide a function to calibrate the module.

Please refer to user manual 1.10.

#### Notice:

- 1. Please update DCON Utility to version 5.2.3 or more.
- 2. Keep the module running more than 30 minutes to warm-up.

### Q5. How to programming with I-7000 or M-7000 by C#, VB, VC?

ICP DAS I-7000 and M-7000 series both support DCON protocol. And Only M-7000 series supports Modbus protocol.

For DCON protocol, please download SDK and Demo from:

http://ftp.icpdas.com/pub/cd/8000cd/napdos/driver/dcon\_dll\_new/

For Modbus protocol, please refer this web link:

http://www.icpdas.com/products/PAC/i-8000/modbus.htm
