Introduction

The EIP-2017 is an 8-ch Differential and 16-ch Single-Ended AI module. The module provides a jumper to switch Differential and Single-Ended mode. It supports voltage and current input type. The accuracy of the measurement is smaller than 0.1% FSR. The Module is designed as an EtherNet/IP adapter. Users can obtain the input status as well as the connection status of the EIP-2017 by the LEDs indication. Inaddition, ICPDAS provides software utility to easily configure and test the EIP-2000 modules via Ethernet.
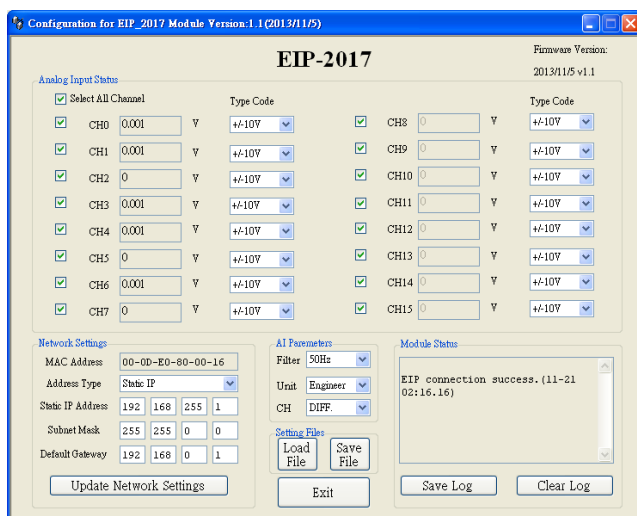

Utility Features

ICP DAS provides the EIP-2000 configuration utility for Windows 2K/XP/Vista and Win 7.Network parameters configuration
- Network parameters configuration
- AI parameters configuration
- Functions configuration such as Type Code selection
- Easy test to transmit/receive the I/O status by EtherNet/IP
- Setting files management
