

ICPDAS EUROPE

OUR OPEN CORPORATE CULTURE IS THE MOST VALUABLE ASSET IN DEALING WITH THE CONSTANTLY CHANGING CONDITIONS.

TIMO REBSTOCK, CEO ICPDAS-EUROPE GMBH

Editorial

Creativity. Flexibility. Reliability.

Dear business partners,

During a state visit by the then US President Barak Obama to Berlin in June 2013, Angela Merkel called the Internet "new territory". Considering that the commercialization of the Internet began in the early 1990s, this quote makes one thing clear. Society, politics and business are developing at different speeds. The fact is that the digitalisation of all areas of life is progressing undisputedly and poses new challenges for our economy in particular. In the industrial environment, this change is referred to as Industry 4.0 and offers a multitude of new opportunities, but also risks, for companies facing this change.

At the beginning of every Industry 4.0 project, there is always the networking and the collection of data on machines and plants. These data are the prerequisite for the following optimizations and adjustments.

With smart products and solutions for industrial automation and communication technology, we create transparency and lower the hurdles to entry into industry 4.0, especially for SMEs - but we always keep an eye on the risks. In this way, our systems create a solid basis for future entrepreneurial decisions.

ICPDAS-EUROPE

Our mission

FLEXIBILITY

Flexibility is the central attribute to meet the demands of our time and to always be a step ahead. Maintaining this flexibility at any time is a promise to all stakeholders.

CREATIVITY

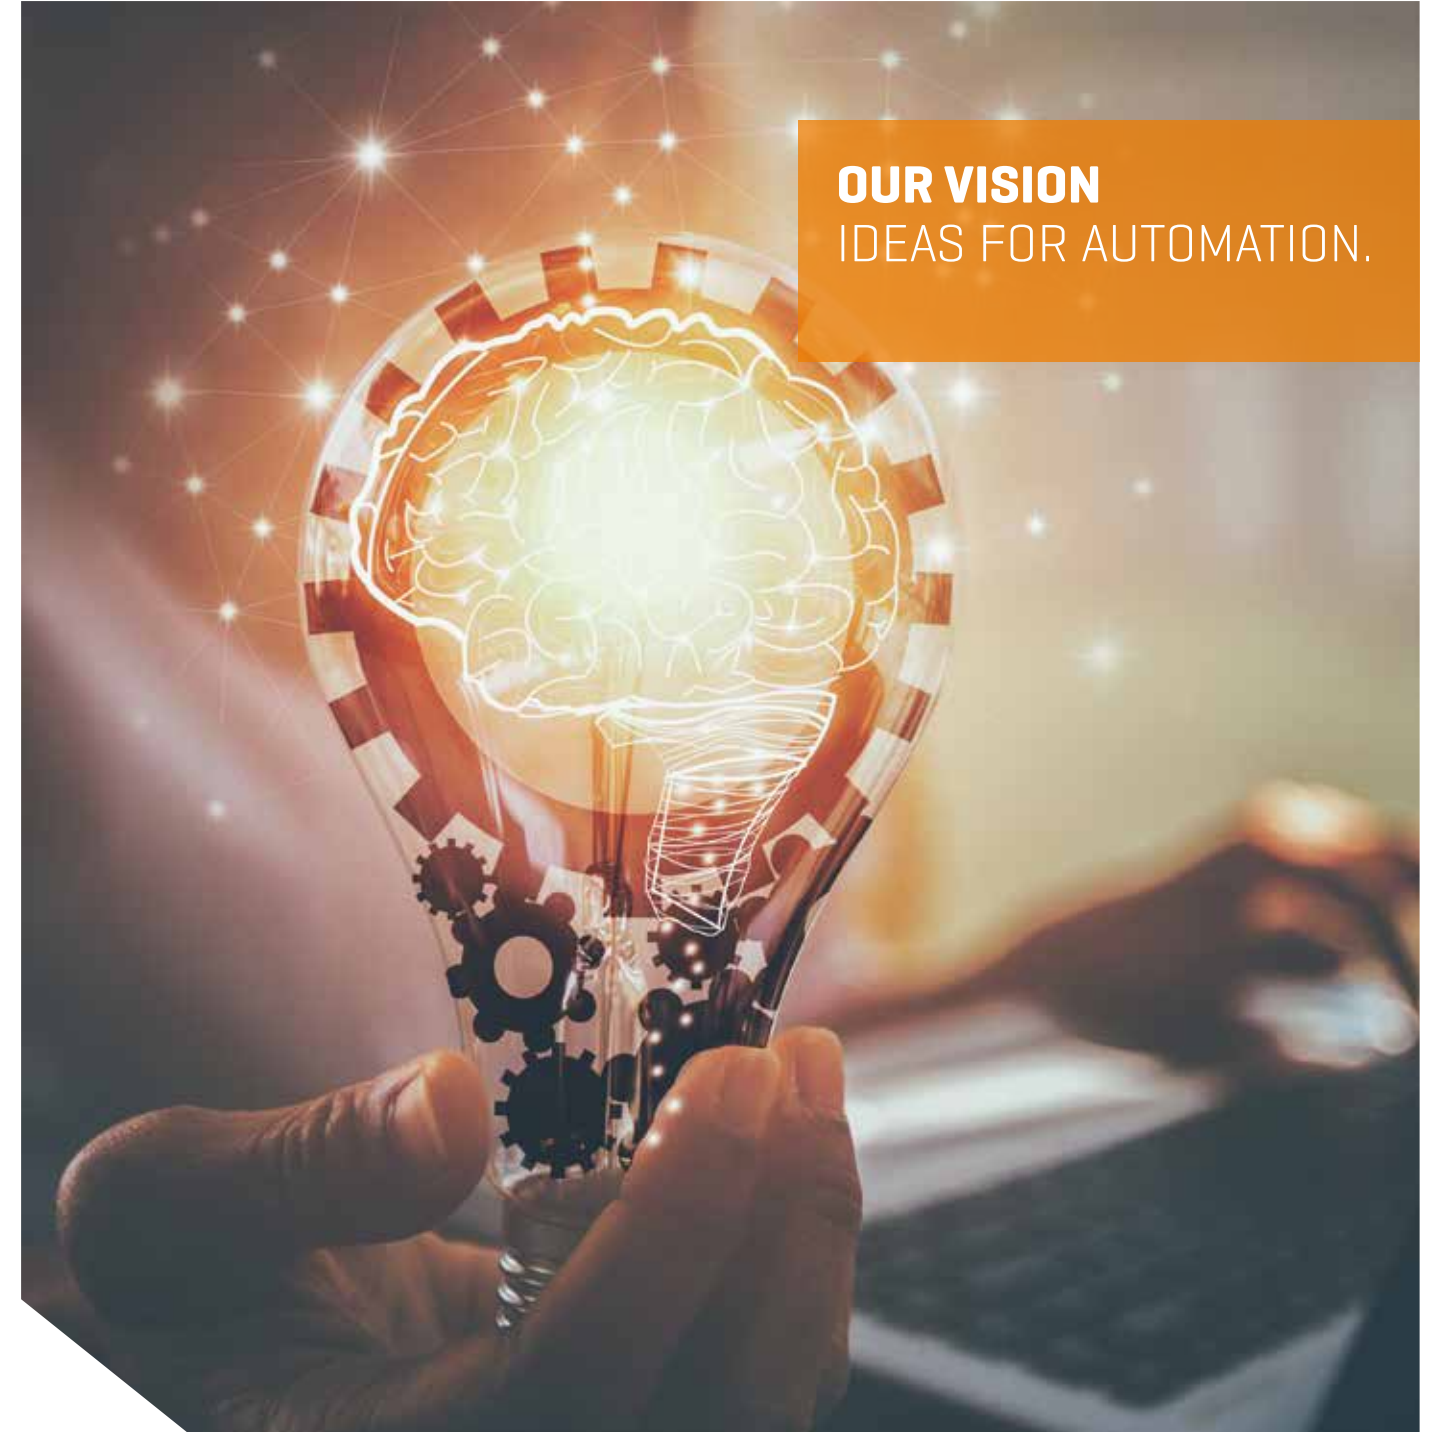

We consider creativity to be sustainability. With creative products and services, we enable you to find individual solutions to achieve your goals while remaining easy to use.

RELIABILITY

The relationships with customers and business partners are focused on mutual sustainable benefits. Reliability is at the heart of our work. Our concern is to combine quality in product, process and service with economic efficiency.

OUR VISION
IDEAS FOR AUTOMATION.

OUR EXPERTISE

AUTOMATION SOLUTIONS TAILORED TO MEET CUSTOMER REQUIREMENTS.

The company

Innovative products and flexible solutions

ICPDAS-EUROPE, based in Reutlingen, Germany, is the European sales and support subsidiary of the Taiwanese manufacturer, ICPDAS Co. Ltd., and supplies customers throughout the whole of Europe. In addition to its sales service, the company also attaches great importance to comprehensive know-how in the field of technical customer support. For customers in search of a special solution to their problem, we offer an extensive OEM service which covers all project phases.

The company

Intelligent automation technology

ICPDAS-EUROPE offers components and systems for industrial automation technology that are characterized by their compact and simple application. This allows smart and cost-effective solutions to be implemented while simultaneously reducing engineering costs.

We offer product solutions in the areas of industrial Ethernet, remote I/O modules, device servers and gateways that support a variety of bus systems and protocols. As well as programmable automation controllers, components for M2M applications and a constantly updated range of user terminals for stationary or mobile use.

Flexibility and short delivery times are particularly important for our customers. With a local logistics centre, warehousing and sales are efficiently organised and delivery times are continuously optimised. As a result, we have many common products available from stock and can guarantee short delivery times. Individual requirements such as stocking or just-in-time deliveries are also common practice for us.

Diverse range of industries

The perfect solution whatever the task

PROCESS INDUSTRY

Predictive maintenance systems increase the performance and profitability of your equipment for maximum safety.

LOGISTICS

Our mobile solutions give you a better overview of your logistics processes.

ELECTRICAL INDUSTRY

A large portfolio helps you to develop optimal system solutions for your customers.

MECHANICAL & PLANT ENGINEERING

State-of-the-art technology combined with our technical know-how support you in the future-proof conception of your machines and plants.

URBAN INFRASTRUCTURE

With our innovative solutions for remote data acquisition, you always have all relevant information at a glance.

E-MOBILITY

From development and production to quality testing, we help you to produce reliable components for an environmentally friendly infrastructure.

BUILDING AUTOMATION

ICPDAS-EUROPE makes building automation intelligent, convenient and environmentally friendly.

RENEWABLE ENERGY

Our products create transparency in your processes and ensure more efficient use of energy in buildings and complex infrastructures.

Impressive product solutions

We care about quality

At ICPDAS-EUROPE, a functioning quality management system is a necessary prerequisite for economic success. Compliance with international standards is taken as a given by our partners and customers. Certification according to the international standard ISO-9001:2008 furnishes proof of the highest quality, reliability and trust. Auditing ensures the continuous improvement of our quality management system. We see the assurance and constant optimisation of our high standards as a daily challenge.

Our range

Everything at a glance

You will find the entire product range together with detailed information on our website.
www.icpdas-europe.com

1

MEASUREMENT

Data acquisition & signal conversion.

- Fieldbus I/O modules
- Fieldbus I/O systems
- PC plug-in cards
- Energy meters

2

COMMUNICATION

Exchange & conversion of data.

- Ethernet switches
- Fieldbus converters and gateways
- Fieldbus repeater hubs
- Device servers
- PC boards

3

CONTROL

Information processing.

- Fanless mini IPCs
- Fanless DIN rail PCs
- Programmable automation controllers
- Smart data loggers

4

MONITORING & OPERATION

Man & machine interfaces.

- Touch HMI controller
- Touch screen panel PC
- Touch monitor
- Tablet PC

Focus on the customer

Your trustful partner

ALWAYS THERE FOR YOU

With our customised support and consultation service, we help our customers to achieve success – throughout Europe, in all industrial sectors and in all markets. Together with our expert staff, we are able to handle the growing demands made of high performance and economic automation products.

MAKING GOOD EVEN BETTER

We ensure that your requirements are met: in line with your needs to ensure the optimised utilisation of production facilities. This is the focus of our technical specialists who, together with the sales team, are committed to ensuring a close and direct relationship with our customers.

FIRST-CLASS SERVICES GENERATE ADDED VALUE

Smooth-running and reliable processes are all important criteria for corporate cost effectiveness and productivity. ICPDAS-EUROPE stands for exemplary support and customer service. We set standards with our technical service, expert advice and support; that is what our customers have come to expect on a daily basis.

> FIRST-CLASS AND RAPID SUPPORT SERVICE

> TAILORED SOLUTIONS TO MEET CUSTOMER REQUIREMENTS

> PROFESSIONAL AND SPECIALIST CUSTOMER SERVICE

CUSTOMER SATISFACTION
IS IMPORTANT TO US.

Communication

Let's stay connected

We invest time in our customer relations and stay in close contact with our markets. Take advantage of our wide range of marketing activities, we would be delighted to be of assistance:

PRINT MEDIA

Our product catalogues provide important product information in a compact and easy-to-understand format. Regular press releases and adverts in various magazines offer details on our product ranges.

DIGITAL MEDIA

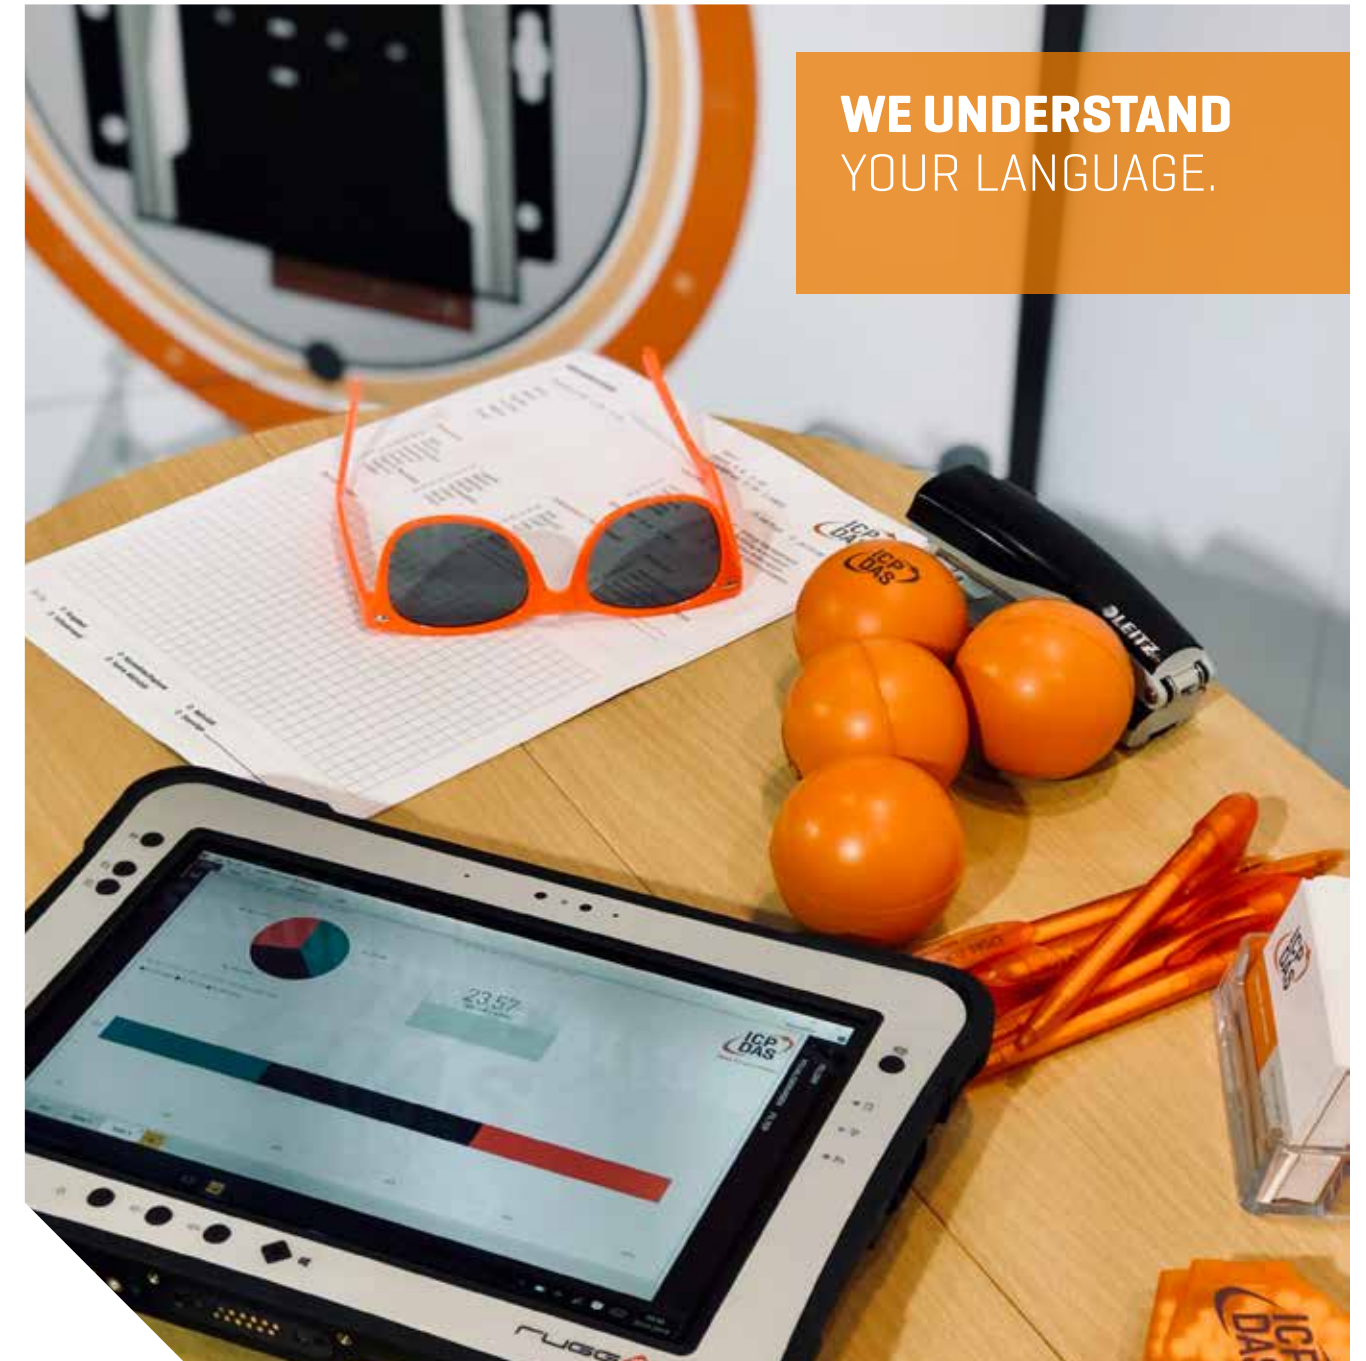

The ICPDAS-EUROPE.COM website offers answers to questions about our products and all the information can be downloaded from our download centre. Queries can be sent to our support service with just a few clicks of the mouse; our experts are happy to help. Register for our newsletter to order to get the very latest news on our products and activities.

TRADE FAIRS

Get to know the ICPDAS-EUROPE team personally by visiting us at our trade fair stand. See the product innovations for yourself on site.
