■ Module test and configuration

Step 1: INIT switch Operation

1. Find out the INIT switch(back of the module), and turn to INIT.
2. Reboot the module

Step 2: Install & Run DCON Utility

1. Please Install DCON Utility first
You can find the software in the CD.

CD path:

<Driver>:\napdos\driver\dcon_utility\

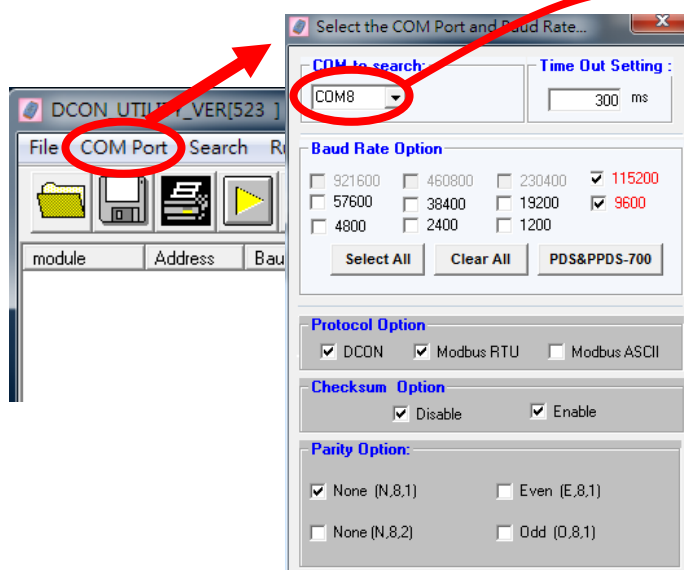

Web link:

http://ftp.icpdas.com/pub/cd/8000cd/napdos/driver/dcon_utility/

2. Run DCON utility

Step 3: Set search configuration & search module

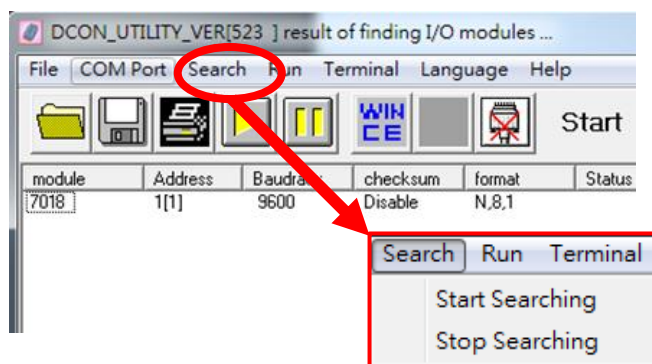

Select COM Port Number

1. Click "COM Port"
2. Assign the communication information and click "OK"

Module Default Setting

COM Port	Refer converter Port Number
Baud Rate	9600
Protocol	DCON for I-7000 Modbus RTU for M-7000
Parity Option	N,8,1

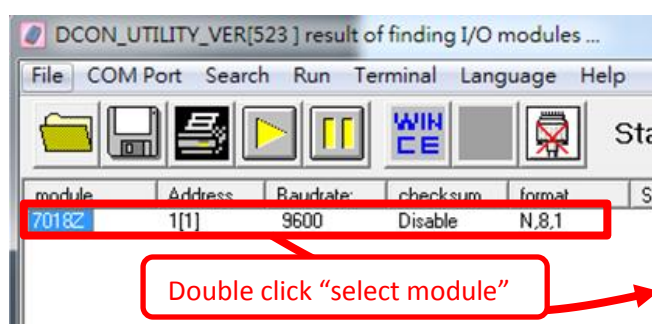

3. Click "Search" and select "Start Searching"
Software will search the modules from COM Port
4. Click "Search" and select "stop searching"
Manual stop when the modules searched

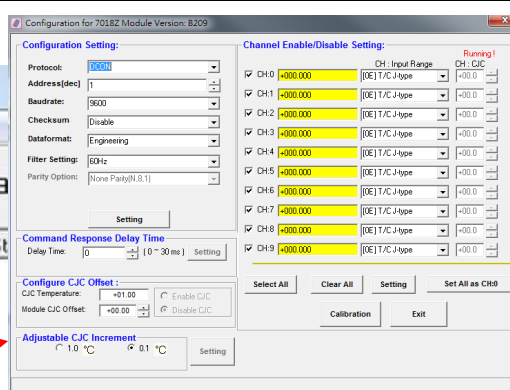

Note:

When no module can be searched, please check the wire and communication information

Trouble Shooting

Q1. How to do when forgot module address or baud rate?

Please turn to INIT mode, and run DCON Utility to search.
 The module supports DCON protocol at the INIT mode.
 And the address is 0. The communication setting is "9600,N,8,1".

Q2. How to configure the I-7000 and M-7000 modules?

ICP DAS provide DCON Utility to configure I-7000 and M-7000 modules.
 Please download the last version from: http://ftp.icpdas.com/pub/cd/8000cd/napdos/driver/dcon_utility/

Q3. What is individual channel configuration?

I-7018Z and M-7018Z provide the "individual channel configuration".
 "Individual channel configuration" means the different settings of the input ranges for each channel.
 You can configure the modules by DCON utility

Q4. What is the CJC function?

CJC (Cold-Junction Compensation) offset is for the temperature measurement.
 You can set a CJC offset for all channels or different channel in DCON Utility,

Q5. How to programming with I-7000 or M-7000 by C#, VB, VC?

ICP DAS I-7000 and M-7000 series both support DCON protocol. And Only M-7000 series supports Modbus protocol.
 For DCON protocol, please download SDK and Demo from:
http://ftp.icpdas.com/pub/cd/8000cd/napdos/driver/dcon_dll_new/
 For Modbus protocol, please refer this web link:
