

# Quick Start Guide for tM-AD8

Mar 2012, Version 1.1.0

## **Congratulations!**

Congratulations on purchasing the tM-AD8 the most popular automation solution for remote monitoring and control applications. This Quick Start Guide will provide information needed to get started with the tM-AD8. Please also consult the User Manual for detailed information on the setup and use of the tM-AD8.

#### What's in the shipping box?

In addition to this guide, the shipping box includes the following items:

tM-AD8

# Understanding the Hardware Specifications and Wiring Diagrams

Before installing the hardware, you should have a basic understanding of hardware specification and the wiring diagrams.

#### **System Specifications :**

### System Specifications \_

Communication					
Interface	RS-485				
Format	(N, 8, 1), (N, 8, 2), (O, 8, 1), (E, 8, 1)				
Baud Rate	1200 ~ 115200 bps				
Protocol	DCON, Modbus/RTU, Modbus/ASCII				
Dual Watchdog	Yes, Module (2.3 seconds), Communication (Programmable)				
LED Indicators					
Power	1 LED as Power Indicator				
Isolation					
Intra-module Isolation, Field-to-Logic	2500 V <sub>DC</sub>				
EMS Protection					
ESD / IEC 61000 4 2)	±4 kV Contact for Each Terminal				
ESD (IEC 01000-4-2)	±8 kV Air for Random Point				
EFT (IEC 61000-4-4)	±2 kV for Power				
Surge (IEC 61000-4-5)	±3 kV for Power				
Power Requirements					
Reverse Polarity Protection	Yes				
Powered from Terminal Block	Yes, 10 ~ 30 Vpc				
Consumption	0.6 W Max.				
Mechanical					
Dimensions (W x L x H)	52 mm x 98 mm x 27 mm				
Installation	DIN-Rail Mounting				
Environment					
Operating Temperature	-25 ∾ +75°C				
Storage Temperature	-30 ∾ +75°C				
Humidity	10 ~ 95% RH, Non-condensing				

#### I/O Specifications :

Recolution	Normal Mode	14-bit				
Resolution	Fast Mode	12-bit				
Sampling Pate	Normal Mode	10 Hz total				
Sampling Nate	Fast Mode	200 Hz total				
Accuracy	Normal Mode	+/-0.1%				
Accuracy	Fast Mode	+/-0.5%				
Zero Drift		+/-20 uV/°C				
Span Drift		+/-25 ppm/°C				
Input Impedance	)	10 ΜΩ				
Overvoltage Prot	ection	120 Vpc				

#### Wire Connection :

#### Pin Assignment :

# 2 Booting the tM-Series in Init Mode

Make sure the switch placed in the "Init" position.

# **4** Installing the DCON Utility

The DCON Utility is an easy-to-use tool designed to enable simple configuration of I/O modules that use the DCON protocol.

#### Step 1: Locate the DCON Utility

The DCON Utility can be obtained from the companion CD or from the ICPDAS FTP site:

DCON\_Utility\setup\ http://ftp.icpdas.com/pub/cd/8000cd/napdos/driver/dcon\_utility/

#### Step 2: Follow the prompts to complete the installation

After the installation has been completed, there will be a new shortcut to the DCON Utility on the desktop.

# **5** Using the DCON Utility to Initialize the tM-Series Module

The tM-Series is an I/O module based on the DCON protocol, meaning that you can use the DCON Utility to easily initialize it.

api

#### Step 1: Run the DCON Utility

#### Step 2: Use the COM1 port to communicate with the tM-Series

Click the "COM Port" option from the menu and a dialog box will be displayed that will allow you to set the communication parameters as described in the table below.

#### Step 3: Search for the tM-Series module

Click "Start Search" button from the toolbox to search for the tM-Series module. After the tM-Series module is displayed in the list, click "Stop Search" button.

#### Step 4: Connect to the tM-Series

After clicking on the name of the module in the list, a dialog box will be displayed.

## 6 Rebooting the tM-Series Module in Normal Mode

Make sure the INIT switch is placed in the "Normal" position.

# **7** Starting the Module Operation

After rebooting the tM-Series module, search for the module to make sure the settings have been changed. You can double click on the name of the module in the list to open the configuration dialog box.
