

# PDS-811/PDS-821

Programmable Serial-to-Ethernet Device Server with 2-port Ethernet Switch and Expansion Slot(s)

## System Specifications

## **Features**

- Incorporate Serial Devices in an Ethernet network
- "Virtual COM" extends PC COM ports
- VxComm Driver for 32- and 64-bit Windows 7 SP1/10/2012/2016
- Programmable Internet/Ethernet Controller
- Watchdog Timer suitable for use in harsh environments
- Built-in High performance MiniOS7 from ICP DAS

| Models                        | PDS-811   | PDS-821                   |
|-------------------------------|---|---------------------------|
| СРИ                           |   |                           |
| CPU                           | 80186, 80 MHz or compatible   |                           |
| SRAM                          | 512 KB  |                           |

| RTC (Real Time Clock)         | -   |                           |
| 64-bit Hardware Serial Number | -   |                           |
| Built-in Watchdog Timer       | Yes   |                           |
| I/O Expansion Slots           | 1 Slot  | 2 Slots                   |
| Communication Interface       |   |                           |
| COM1 (Console)                | RS-232 (TxD, RxD, GND)  |                           |
| Ethernet                      | 2-port 10/100 Base-TX Ethernet Switch (Auto-negotiating, auto MDI/MDI-X, LED indicator) |                           |
| COM Port Formats              |   |                           |
| Data Bit                      | 7, 8  |                           |
| Parity                        | None, Even, Odd   |                           |
| Stop Bit                      | 1   |                           |
| Baud Rate                     | 115200 bps max.   |                           |
| LED Indicators                |   |                           |
| TxD/RxD                       | Yes   |                           |
| System                        | Yes   |                           |
| Power                         |   |                           |
| ESD Protection                | Yes (with Frame Ground)   |                           |
| Protection                    | Power Reverse Polarity Protection   |                           |
| Required Supply Voltage       | +10 VDC ~ +30 VDC   |                           |
| Power Consumption             | 0.6 A @ 5 V for CPU and Backplane,<br>1.0 A @ 5 V for Plug-in Modules,<br>Total: 8 W    |                           |
| Mechanical                    |   |                           |
| Flammability                  | Fire Retardant Materials (UL94-V0 Level)  |                           |
| Dimensions (W x L x H)        | 64 mm x 120 mm x 110 mm   | 95 mm x 132 mm x 110 mm   |
| Installation                  | DIN-Rail  | DIN-Rail or Wall mounting |
| Casing                        | Plastic   | ·                         |
| Environment                   |   |                           |
| Operating Temperature         | -25 °C ~ +75 °C   |                           |
| Storage Temperature           | -40 °C ~ +80 °C   |                           |
| Humidity                      | 5 ~ 90% RH, non-condensing  |                           |

## Introduction

The PDS-811 and PDS-821 programmable device servers (PDS) are compact, modular, intelligent, rugged, and are designed for networking RS-232 and RS-422/485 serial devices to an Ethernet network. The PDS-811 has one I/O expansion slot, while PDS-821 has two I/O expansion slots that can be used to attach various 2- or 4-port serial communication modules. Therefore, a maximum of 4 serial ports can be installed on the PDS-811 or a maximum of 8 serial ports can be installed on the PDS-821.

37.2

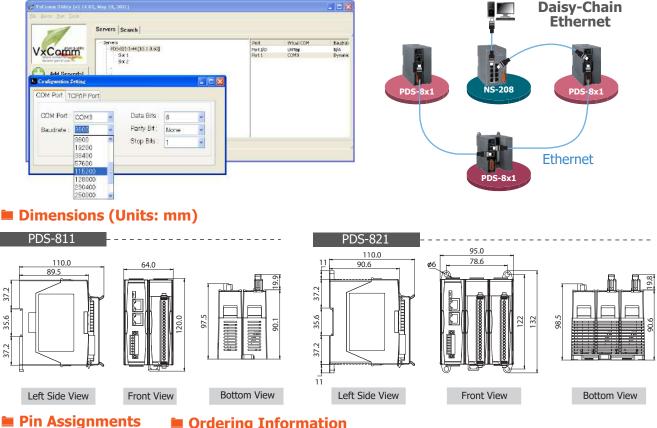

35.6

37.2

Note: There is no serial module built-in to the PDS-811 or PDS-821 by default.

The PDS-811 and PDS-821 controllers are equipped with a 2-port 10/100 Base-TX Ethernet Switch that can be used to connect two network segments. The Ethernet Switch processes and routes data on the datalink layer (layer 2) of the OSI model to create a different collision domain per switch port. Using a switch allows you to attain dedicated bandwidth on point-to-point connections with every computer, and therefore run in full duplex mode with no collisions. Furthermore, the built-in 2-port Ethernet Switch on the PDS-811/821 enables network wiring to be simplified by cascading your Ethernet devices.

The PDS-8x1 series contains a built-in operating system, the MiniOS7, which offers a stable and high performance environment that is similar to DOS. The MiniOS7 can boot up the PDS-8x1 series within just one second, with the added benefit of no virus problems and a small footprint. Furthermore, the PDS-8x1 series is designed for low power consumption, maintenance elimination (no hard disk and no fan), and is constructed from fire retardant materials (UL94-V0 level) with a robust case.
