Introduction

The NSM-206PF series is 6-port unmanaged Ethernet switch supporting Power-over-Ethernet on ports 1 to 4. The switch is classified as power source equipment (PSE), and when used in this way, the NSM-206PF series enable centralization of the power supply, providing up to 30 watts. The NSM-206PF series can be used to power IEEE 802.3af/at standard devices (PD).

Redundant Power Input

Both power inputs can be connected simultaneously to live DC power sources. If one power source fails, the other live source will act as a backup, and automatically supplies all of NSM-206PF Series power needs.
If operating at high loading (total PoE Loading over 60w) suggest used dual input power supply.
